Certifications

- Got 2 extra Miler Awards for delivery high quality product within stipulated time.
- Received 3 letter of recommendations from companies after completion of my tenure.

Achievements

- Designed and implemented a scalable backend system for the Waqf Project at Go Software, resulting in a 20% improvement in application performance.
- Developed a dynamic and responsive client-side application using React.js for Innovacio Technologies at Innovacio Technologies, leading to a positive user feedback increase of 30%.

Education

Heritage Institute of Technology

2019 - 2023

Bachelor of Technology (Electronics and Communication Engineering)

National High School

2016- 2018

Higher Secondary in Science with 74%

The Crescent School

2008-2016

Secondary with 74%

Skills

- Frontend: Js, React.js, HTML5, CSS3
- Backend: Node.js, Express.js, Php, Java
- Database: MongoDB, MySQL, RoomDB
- Other Technologies: Git, GitHub, GitLab
- Testing: Software testing for responsiveness and efficiency
- Programming Paradigm: Functional Programming
- State Management: Redux, Redux Toolkit
- Styling Components: Material Ui, Bootstrap, Tailwind, Ant Design and more
- Additional Knowledge: Android Development
- DevOps: AWS, GitHub CICD, Firebase

Experience

Full Stack Developer (2023-onwards)

Go Software

- Designed and implemented production-grade backend applications using Node.js, ensuring scalability and efficiency.
- Developed responsive and dynamic frontend applications with React.js, incorporating essential React Hooks for optimal performance.
- Integrated MongoDB databases for seamless data management and retrieval.
- Conducted thorough testing to ensure the responsiveness and efficiency of the software.

FrontEnd Developer (Freelencer) (2022)

YesNFT

- Implemented state-of-the-art UI/UX concepts for enhancing the user experience in the website.
- Designing and developing Front End Code using React js. Integrating apis from Back End also from Block Chain

Full Stack Developer (Internship) (2022)

Caarya

- Utilized Redux and Redux Toolkit for effective state management in both frontend and backend development.
- Creating apis in Node js mostly for file generation. DB - MySQL. Integrating developed apis to the frontend in React js.

Web Developer (Internship) (2021)

Innovacio Technologies

- Worked on an erp project with multiple roles and focus on creating responsive and user attractive interfaces using React js
- Also created the company's official website with Admin Panel completely from scratch. Worked on both Frontend and Backend
- Also lead a team of three members to build the Drala IO project which is a Block Chain based project

Mern Stack Developer (Internship) (2021)

Learn for Cause

- Started working in the frontend which was build on React js to created highly responsive and providing high level UX.
- Also shifted to the backend to create high performance apis in node js.
- Created Authentication system for the application using Google Auth, Twitter Auth and other.

Web Developer (Internship) (2021)

Rehabilitation Society of the Visually impaired

- Started working as a React js developer to develop responsive and user attractive interfaces using React js.
